

NGUYEN TUAN ANH

Hanoi, Vietnam

anhantuannguyen10012004@gmail.com — +84 888 009 746 — GitHub

Education

Posts and Telecommunications Institute of Technology (PTIT) <i>High Quality Program in Information Technology Engineering</i>	2022 – Present <i>Hanoi, Vietnam</i>
---	---

Specialization: Software Engineering

Relevant Coursework: Software Engineering, Database Systems, Web & Mobile Application Development, Object-Oriented Programming, Distributed Systems

Technical Skills

Languages: TypeScript, JavaScript, PHP, Java, Python, SQL

Frameworks & Tools: NestJS, ExpressJS, ReactJS, Next.js, React Native, Laravel, Docker, Git, Linux, Redis, Kafka, RabbitMQ

Databases: PostgreSQL, MariaDB, MongoDB

Core Concepts: REST API, GraphQL, OOP, Database Design, Microservices, Message Queue, CI/CD

Projects

SteameQ E-Office <i>Digital Transformation Platform – AKB Software Internship</i>	2026
---	------

- Contributed to enterprise digital transformation features for office administration and operational workflows in a Laravel-based system.
- Built and maintained core modules for leave management, payroll processing, absence tracking, and automated timekeeping workflows.
- Supported the migration from Laravel 6 to Laravel 12 and refactored functional modules to improve scalability and maintainability.
- Tech stack: PHP Laravel, MariaDB, Redis, Kafka, GitLab.

HTECH Event Management System <i>Full-stack Web Application – Freelance Project</i>	2026
---	------

- Led a 3-member development team to build a web platform for managing exhibitions, events, and company websites.
- Implemented admin-side RBAC authentication, event management, exhibitor management, and resource management modules.
- Set up CI/CD workflows, supported production deployment, and integrated communication between the admin system and public-facing websites.
- Worked with clients to gather requirements, prioritize features, and deliver project iterations.
- Live links: <http://admin.htechevent.com/login> (management portal), <http://htechevent.com> (public website), and <http://180.93.1.86:3030> (ongoing exhibition project).
- Tech stack: NestJS, ReactJS, PostgreSQL, Git.

My Strength Level

Full-stack Mobile Application Development Project

- Developed authentication and session management interfaces using React Native and React Native Paper.
- Built responsive UI/UX for workout template management and workout tracking features.
- Integrated frontend components with backend RESTful APIs for authentication and workout management.
- Collaborated with team members using Expo Router, Zustand, and TanStack Query throughout the development lifecycle.
- Repository: <https://github.com/anhNT-DEV1001/Mobile-BTL>.

Experience

Backend & Full-stack Development Intern <i>AKB Software</i>	10/2024 – Present <i>Hanoi, Vietnam</i>
---	--

- Contributed to digital transformation solutions for enterprise office management systems.
- Supported development and customization of the SteameQ E-Office platform for enterprise customers.
- Contributed to the SteameQ Tuition Fee Notification system for automated fee calculation and management workflows.
